Creating a Login Account on
the ELLE Website

1. Go to the ELLE website : https://chdr.cs.ucf.edu/elle/home
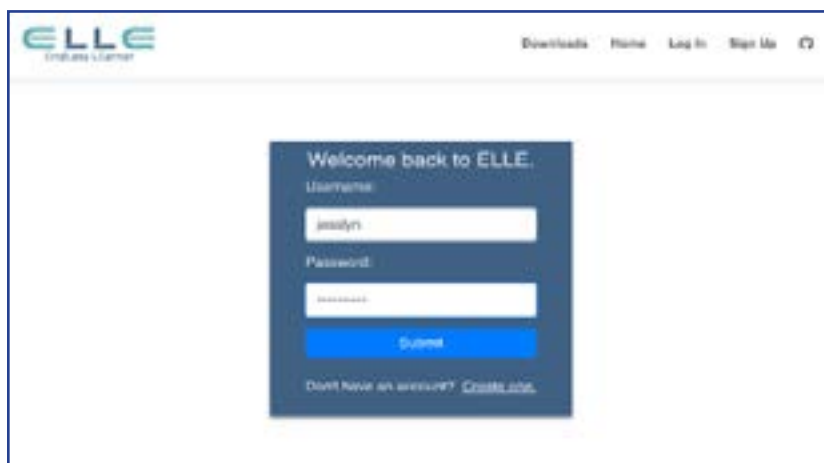

2. In the upper right hand corner you will see a "Sign Up" option.
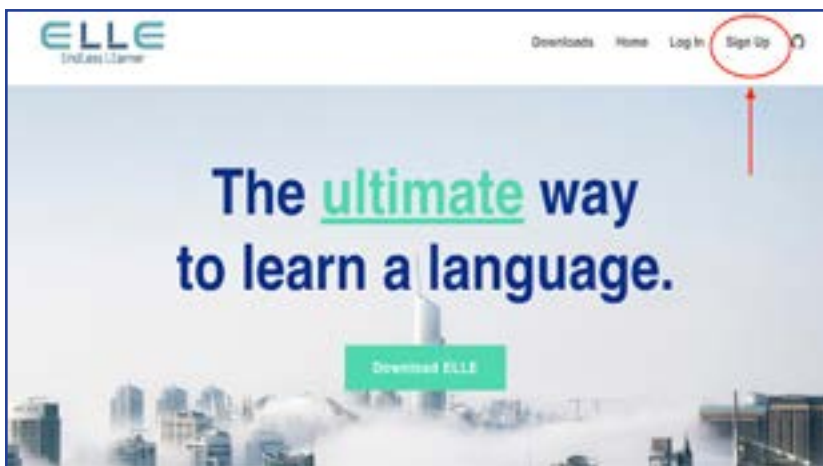

3. Now you will be able to create an account–choose a username and password. There is a picture below showing an example. If you know your class code, enter this as well. If you do not know the class code you can also enter it later.

4. After you click "Signup" you will next be directed back to the Login screen. Enter the Username and Password you created.

5. If you did not have a class code when you filled in your account information in Step 4, you can enter your course code in the bottom left-hand corner of your dashboard where it says "Join a New Class."

6. Now that you have created an account, login and locate the "VR Game Code" tab in the top right corner.
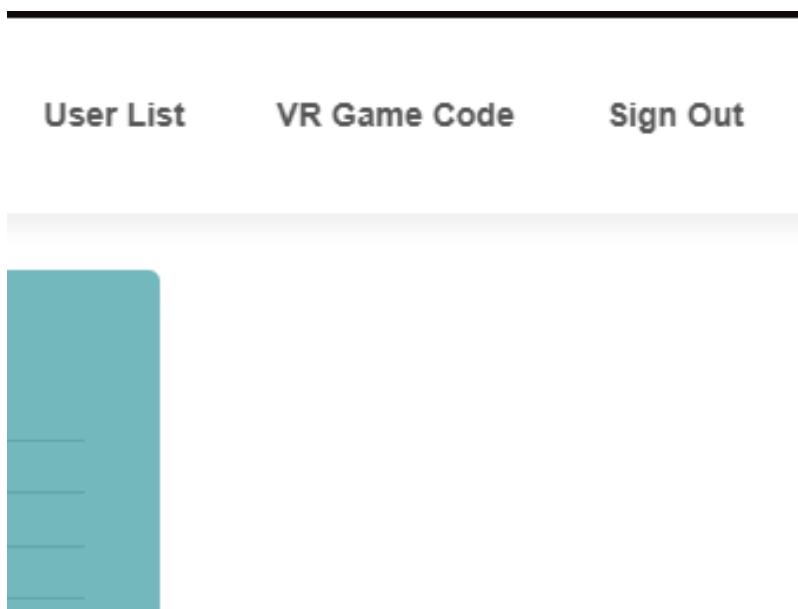

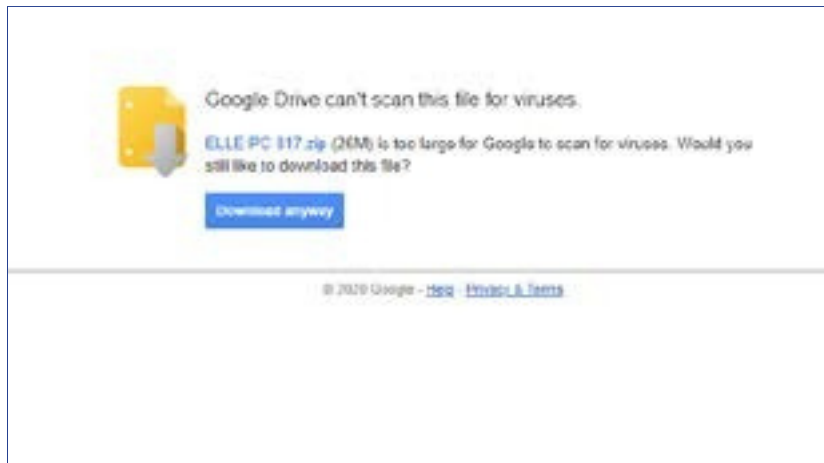

ELLE Download Instructions for PC:

1. Click on the following link to download the zip file: Click Here. Download the entire zip folder of the game by clicking the down arrow.

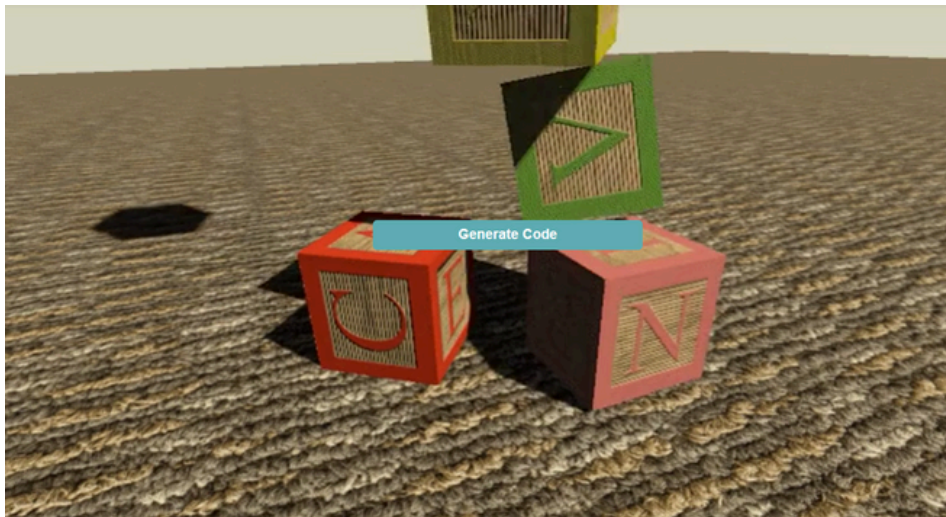

2. Open file and extract all.

3. Click on the download anyway button next.

4. Open the file "ELLE Desktop Hub Launcher.exe."

5. Once the game has opened (it can take a few minutes), locate the "Generate Code" button in the previously mentioned VR Game Code Tab.

If you do not yet have a username/password, pause and go to https://chdr.cs.ucf.edu/elle and create a username and password.Refer to the instructions on for creating an account.

6. Save your provided code as it will allow you to login to desktop hub world. (A new code will need to be generated for each login)

7. Head on over to your opened game and use your keyboard to type in your One Time Code, then press enter!

8. You will be loaded into the hub world, where you can walk using W A S and D. You will then locate a game teleporter within the world and press SPACE to begin playing!
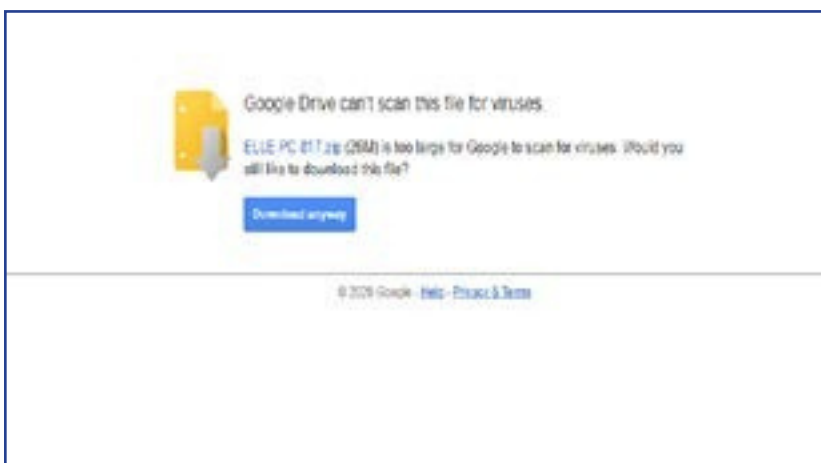

ELLE Download Instructions for Mac:

 1. Go to the shared link: [Click Here](). To get started click on the download icon like the one circled in the picture below.

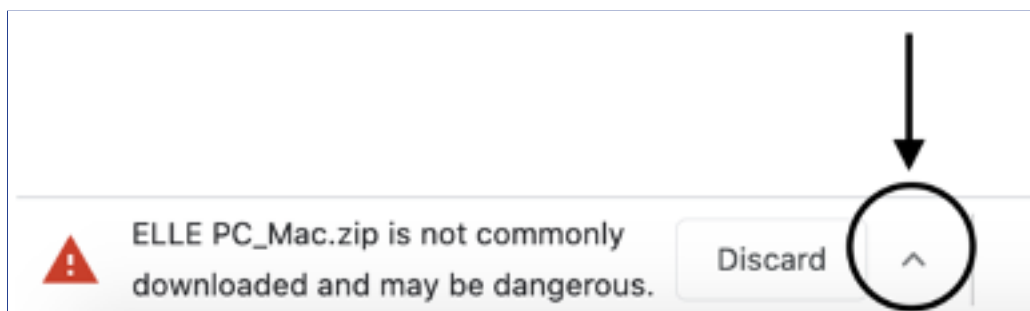

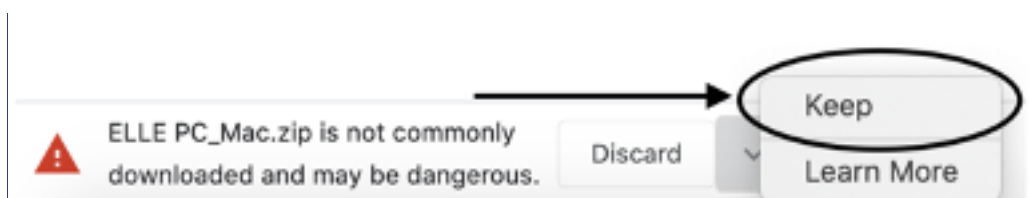

2. Click on the download anyway button next.

Afterwards, follow these instructions below to avoid discarding the download.
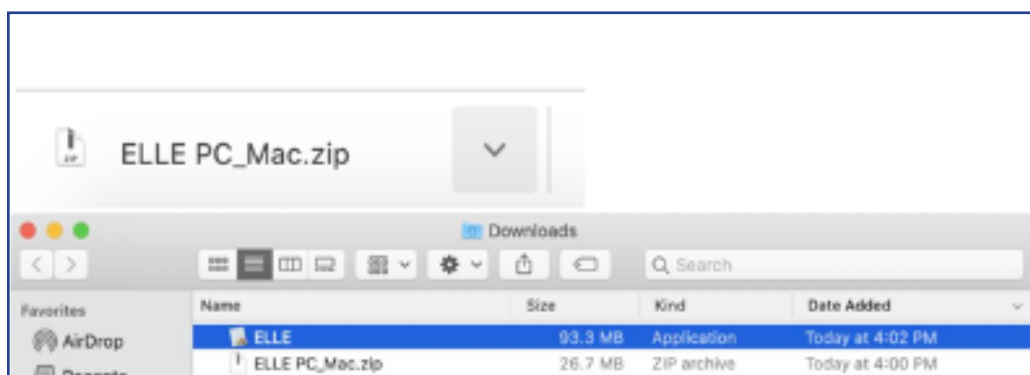

3. Click on the arrow within the warning button that pops up after the zip folder has finished downloading in your browser.

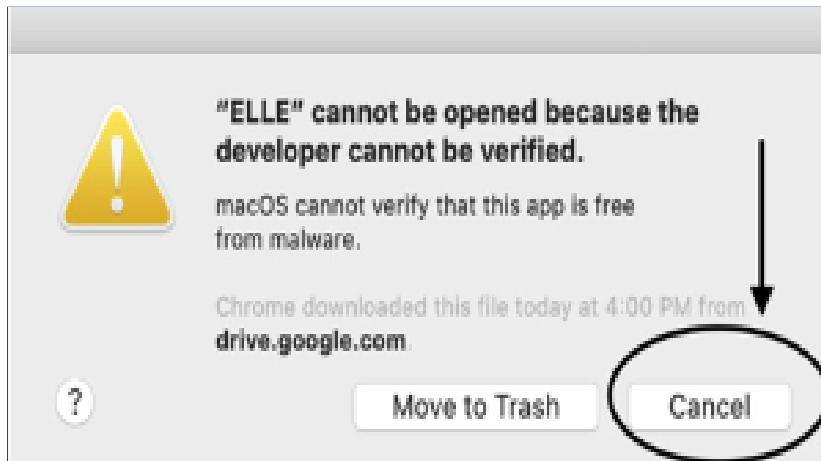

4. Click on the keep option.

5. Once the keep option is pressed, the warning will disappear, and you can click on the downloaded zip. By clicking on it, the zipped folder will be extracted, and your download folder should appear.

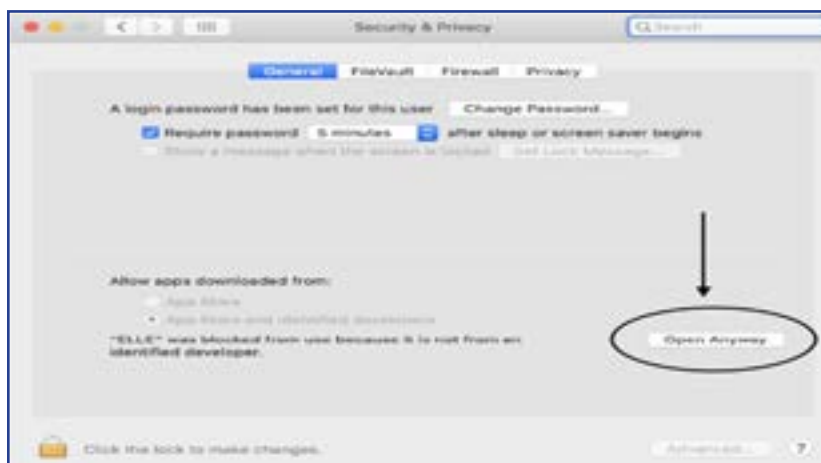

6. You will be told "'ELLE' cannot be opened because the developer cannot be verified."

7. Press the cancel button that appears on the warning.

8. Then find the apple icon on the top left corner of your Mac > click on System Preferences > Security and Privacy. Once you have arrived on that setting, you will see the option to open the ELLE application.

9. Override the system security to allow the app to run on your Mac, double press the "Mac ELLE Build" application file.

10. You will be prompted with a warning stating: "macOS cannot verify the developer of 'ELLE.' Are you sure you want to open it?". Click on the open button, and the ELLE application will begin running on your Mac, follow the previous instructions for gameplay!
